## Holistic Development of the Students by addressing Sustainable Development Goals

The Sustainable Development Goals (SDGs) are a set of 17 global objectives adopted by the United Nations in 2015 as part of the 2030 Agenda for Sustainable Development. These goals aim to tackle pressing global challenges, including poverty, inequality, climate change, environmental degradation, peace, and justice. Each goal is supported by specific targets to be achieved by 2030, providing a comprehensive framework for governments, businesses, and civil society to work collaboratively toward a sustainable future.

As a member of the United Nations, India is also committed to achieving these 17 SDGs, which encompass the socioeconomic and environmental dimensions of development, with a central focus on eradicating poverty in all its forms. To effectively achieve the SDGs, it is crucial to bring these goals into focus at the local level. The Ministry of Panchayati Raj

of the Government of India has identified nine thematic areas under three broad categories—**economic sustainability, social sustainability, and environmental sustainability**—for the localization of the SDGs in Panchayats. These locally adaptable goals, as defined by the Ministry, are highly relevant to our institution as well.

Our college, inaugurated by the Hon'ble Chief Minister in 2014, was established with the primary aim of addressing the academic needs of economically disadvantaged and underprivileged students in the rural and backward areas of Paschim Medinipur, specifically in the Jangal Mahal region of West Bengal, which has experienced decades of deprivation. Most of our students come from low-income families residing in socioeconomically backward villages.

Recognizing that education is key to achieving sustainable development, we have undertaken the task of educating our students about sustainable living practices. This education will empower them to become economically independent, socially aware, and environmentally conscious. In alignment with the Ministry's three categories—economic sustainability, social sustainability, and environmental sustainability—we have integrated these themes into our several activities to inspire our students to embrace sustainable living practices and contribute meaningfully to their communities and beyond. Following is a report of our college's multiple activities organized under these three categories.

## Economic Sustainability

1. To alleviate the economic burden one has to bear for the pursuit of higher studies, our college has

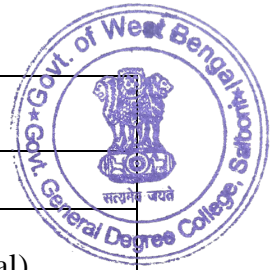

stipulated the fee-structure for the students at the bare minimum. We encourage students coming from various socio-economic background to follow their ambitions and fulfil their dreams by making several Government sponsored scholarships and students welfare schemes widely known and easily accessible to them.

2. The college organizes different programmes and observes the days relevant to these issues by conducting cultural events throughout the year. This includes celebration of Women's Day, the Republic Day, Independence Day, birthday of Babasaheb Bhimrao Ambedkar, Swami Vivekananda, Netaji Subhas Chandra Bose, Iswar Chandra Vidyasagar, Rabindranath Tagore, Kazi Nazrul Islam, Pt. Raghunath Murmu and so on.

3. To sensitize all our stakeholders about the roles and responsibilities to build a world free from any discriminations, we have organized seminars on the relevant issues. The Gender Sensitization Sub-committee, in collaboration with the IQAC, has invited eminent academicians to enlighten our students on femininity, by conducting an online seminar titled “Figuring Femininity”. Another lecture was delivered on “Social Values and Ethics” by Dr. Tapan Kumar De, Professor, department of Philosophy, Vidyasagar University. Social Activist Mrs. Roshenara Khatun has also shared her ordeal in dealing with the challenges posed by our society to women and counselled our students on how to overcome them.

# Environmental Sustainability

1. We have a very active unit of NSS, consisting of a number of our students and led by Mr. Sandeep Das, Assistant Professor of Sociology. The unit conducts and organizes several programmes throughout the year that make the students aware of the roles and responsibilities towards environment. They also organize regular tree plantation drives, campaigns against using plastic etc.

2. Our institute has declared Thursday of every week to be observed as “No Vehicle Day” to inspire all our stakeholders to do every little bit possible for our environment.

3. Our Institution has set up a rain water harvesting system that gathers rooftop rain water via a network of pipes. This water is then directed into a storage tank and the water stored in the tank is used for gardening. In this way water conservation is maintained.

4. Our institute has embarked on a Green Campus Initiative and adopted Green Policies to ensure conservation of environment. We also understand that being a higher education institute that houses more than one thousand stakeholders, we have to consume energy responsibly and make necessary amends for the damages caused by the consumption.
